Model: BLAZE 200D TURBO

HEATER

Introducing the Blaze 200 D/G Turbo, a powerful, high-performance heating solution engineered to deliver exceptional efficiency, reliability, and versatility. With an impressive 86% efficiency rating and advanced recirculation capabilities, this heater is designed to maximize heating performance while significantly reducing fuel consumption and operating costs. Capable of delivering clean, heated air through up to 150 feet of ducting without thermal cycling, the Blaze 200 D/G Turbo sets a new standard in its class.

- Whisper Quiet (SOFT START/NO INRUSH)
- Discharge Temperature up to 290F
- Recirculating Capabilities
