Model: PCS-HEPA500

The Dri-Eaz F284 DefendAir HEPA 500 Air Purifier delivers powerful, high-efficiency air filtration in a compact, portable design. Equipped with advanced HEPA filtration technology, the unit captures 99.97% of 0.3-micron oily aerosol particles, helping improve indoor air quality in demanding environments. Featuring adjustable airflow from 250 to 500 CFM, the HEPA 500 provides versatile performance for water damage restoration, construction sites, commercial facilities, and industrial applications. Its space-saving design, reliable operation, and superior filtration capabilities make it an ideal solution for maintaining cleaner, healthier indoor environments.
