## Model: PCS-HC55U-L

The HEPACART™ mobile dust containment unit collects and filters dust and pathogens, to significantly reduce the risk of patients and staff acquiring nosocomial, hospital-acquired infections. The embedded negative air machine is independently inspected and certified at true HEPA cleanliness level; filters are scan tested and certified at 99.99%. Excellent for small-space, high-risk applications.

### Features:

- Embedded, lab tested HEPA filtration system with each unit tested and certified prior to shipping.
- 15 work efficiency options included including the HALO LED light package.
- Sets up and moves in less than 90 seconds.
- Enclosure is antimicrobial, anti-static, fire resistant and easy to clean. Super durable and healthcare facility approved.
- Heavy duty framed base with each caster rated for 900 lbs. Our original HEPACART® models from 2007 are still utilized today.
