(DEHUMIDIFIER)

Model: PCS-LGR7000

The LGR 7000XLi Dehumidifier* delivers exceptional moisture removal and energy-efficient performance in a compact, portable design. The unit maximizes efficiency while built-in sensors continuously monitor conditions and automatically adjust operating settings for optimal performance.

Weighing approximately 102 pounds, the LGR 7000XLi provides powerful dehumidification with up to 40% better low-grain performance than competitive units. Ideal for water damage restoration, commercial drying, construction sites, and industrial moisture control, this unit offers reliable, high-capacity performance in demanding environments.
