Model: PCS-24

2 TON A/C

230/1PH @ 11.5 Amps

230V/1PH @ 11.5 Amps

The PCS-24 Portable Spot Cooler is a self-contained cooling solution engineered for rapid deployment and reliable performance. Ready to operate in just minutes, it delivers 29,000 BTU (2 tons) of cooling without the need for costly or permanent installation. Ideal for temporary or supplemental cooling, the PCS-24 is well suited for offices, data centers, classrooms, healthcare facilities, patient rooms, manufacturing areas, warehouses, and other indoor environments. Any space with access to a ceiling plenum or ceiling tile for warm air exhaust provides an optimal installation. Operating on 230V single-phase power at just 11.5 amps, the PCS-24 offers an efficient, portable solution for emergency cooling, planned maintenance, equipment protection, and supplemental climate control.

Features:

- Built in Condensate Tank
- Powerful 29,000 BTU
- Auto Restart after Power Interruption
- Temperature Control Thermostat
- Easily Portable
