(A/C UNIT)

Model: PCS-25TON

Features: PCS-25 TON

This heavy-duty air conditioning unit is designed to deliver reliable cooling, heating, and dehumidification for demanding commercial and industrial applications. Featuring dual-stage refrigeration capacity control, 72 kW electric heating elements, and a powerful 10,000 CFM fan, the unit provides efficient climate control and dependable performance. Equipped with environmentally friendly R-410A refrigerant, direct-drive condenser fans, hot gas bypass, and built-in safety controls, it ensures consistent operation.
